What is the purpose of the "Applied Steps" pane in Power Query?
It's where Power Query shows every action I've done.
Lets me go back, edit, or delete steps without starting over.

How do you remove duplicate rows in Power Query?
I select the columns I need.
Go to Home → Remove Rows → Remove Duplicates.

What does the "Filter" icon do in Power Query?
The little funnel on a column.
Lets me pick values or conditions to narrow my data

How would you rename a column from "CustID" to "CustomerID"?
Right-click the CustID column header.
Choose Rename and type CustomerID

What happens if you click "Close & Apply" in Power Query?
Saves all my transformations.
Loads the cleaned data into Power BI and updates my report.

How would you handle null values in the Price column?
Filter them out if I don't need them.
Or replace null with 0, an average, or another default value.
Sometimes I'll Fill Down or Fill Up if a nearby value should be used.
